EX-10 Internetworking
Cisco Packet Tracer Simulator

AIM:- TO design and configure a simple internetwork using a router wireless routers, DHCP server and internet in CISCO Packet Tracer.

PROCEDURE:-

1. Internet networking using a router
2. Open Cisco packet tracer and add (Router) and two PCs (Pc0, PC1)
3. Connect both Pc's to the router using copper straight through cables
4. Configure the router using CLI.
5. Configure IP
6. Set the wireless router SSID to homenetwork and network and enable DHCP.
7. Connect the laptop to homenetwork for Configure PC
8. Enable DHCP of DNS Service on the Server.

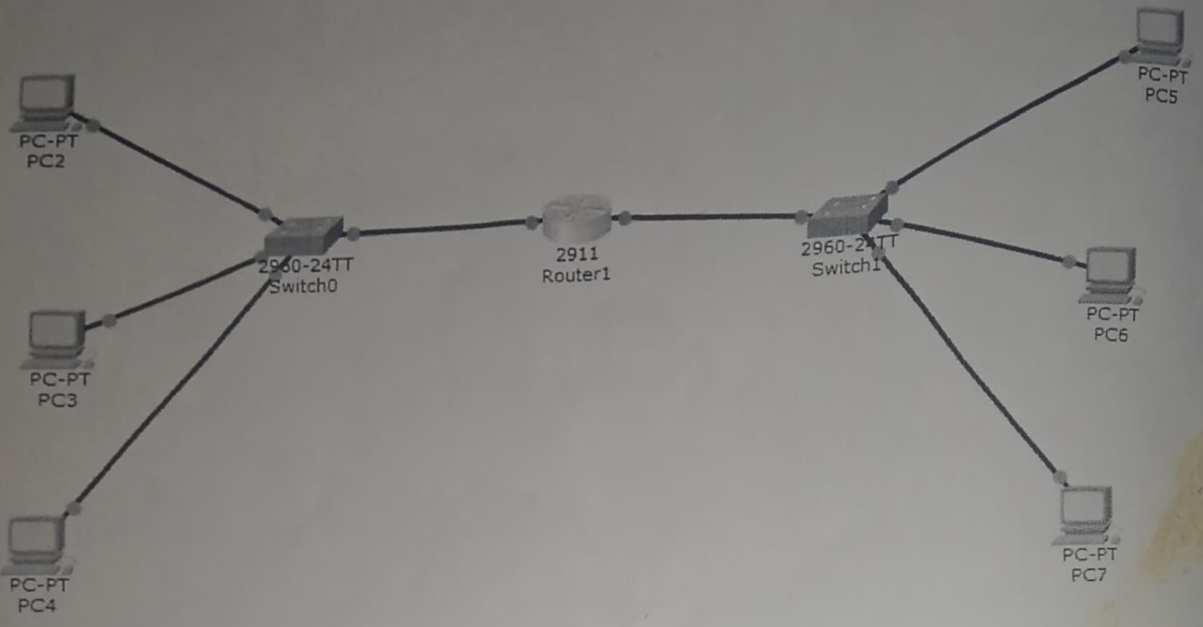

Result:-

The internetworking was successfully designed Configure in Cisco packet Tower, Router, Communication, Wireless, Connectivity DHCP were Visual successfully.

```
Router(config)#interface gigabitethernet 0/1
Router(config-if)#ip address 192.168.20.1 255.255.255.0
Router(config-if)#no shutdown

Router(config-if)#
%LINK-5-CHANGED: Interface GigabitEthernet0/1, changed state to up

%LINEPROTO-5-UPDOWN: Line protocol on Interface GigabitEthernet0/1, changed state
to up
exit
```

```
Router#enable
Router#show ip interface brief
Interface              IP-Address      OK? Method Status                Protocol
GigabitEthernet0/0     192.168.10.1    YES manual up                    up
GigabitEthernet0/1     192.168.20.1    YES manual up                    up
GigabitEthernet0/2     unassigned      YES unset  administratively down down
Vlan1                  unassigned      YES unset  administratively down down
Router#
