14 Implement packet sniffing Using Of Raw Sockets

Aim:-
to implement packet sniffing using non-sockets in Python and Capture network packets

Procedure:-

1. Open VS code an Create an python file.
2. Import the require socket and struct libraries
3. Create an configure a raw socket missing local IP address
4. Run VS code as Administrator and events the program.
5. Generate network traffic missing ping 8.8.8.8
6. Capture and display.

RESULT:-

Thus, Packet sniffing was successfully Using raw sockets an python, network Packets well capture and their details displayed.

Either /IP/

Source IP:- 172.16.79.235

Dest IP: 239.0.0.0.8

Either/IP/ UDP / 172.16.79.235
239.0.0.8.170
Source IP: 172.16.79.235

Program:-

```
import Socket;
Sniffer = socket(
        Socket.Af.Inet
        Socket.Sock.Raw
        Socket.Priority
) if{
host name = Socket.get host name
local-IP = socket.get host.
Print(=*45)
Sniffer();
} else
    Print("Protocol": Protocol)
finally:-
    Sniffer.ioctl(Socket.sio)Bu
    Sniffer.close.
```
