23/7/26 EXP: 3a

UNDERSTANDING THE CISCO PACKET TRACER ENVIROMENT

AIM:

To understand the cisco Packet Tracer envisoment and design a simple computer network using its interface and networking components.

Steps:

Open the cisco Packet tracer application

Observe the user interaface, including the menu bar, Main tool bar, work space, Common tool bar, Network Component Box, and Realtime / Simulation tabs.

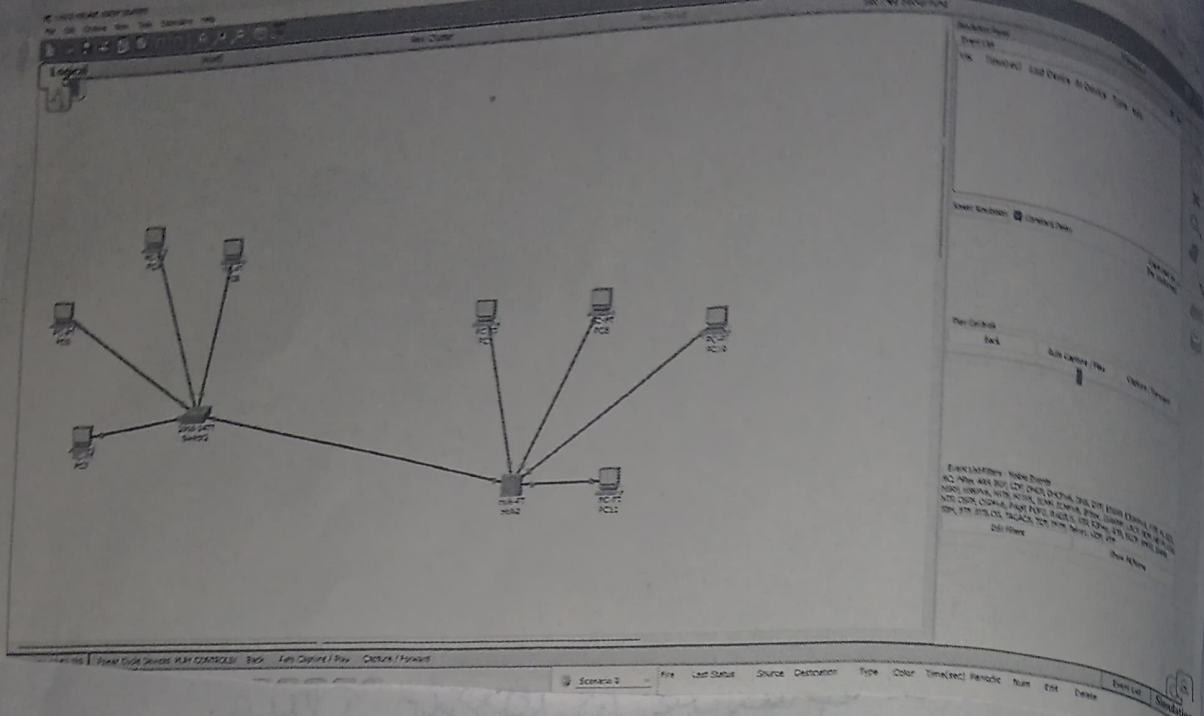

From the Network Component Box, Select the required network devices such as PCs, hub, and Switch.

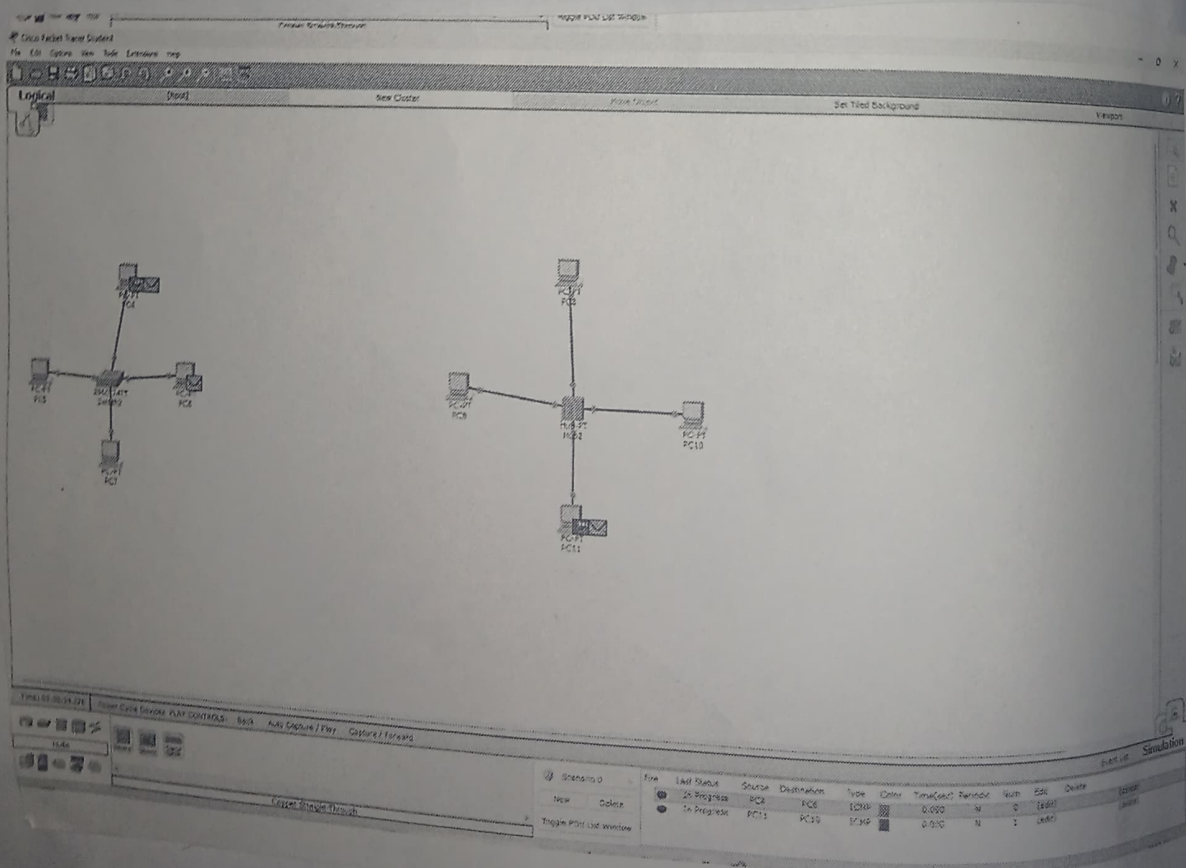

Drag and drop the devices using Copper Straight - through Cables.

Configure IP addresses for the PCs using the desktop → IP Configuration Option

Verify that all links are active (green LED).

Use the Add Simple PDU tool to send Packet between two PCs

Observe packet transmission in Realtime Mode and Simulation Mode.

Save the network topology

RESULT:

The Cisco Packet Tracer environment was successfully explored, and a simple network was designed. The interface components, device connections, IP configuration and packet transmission were successfully understood using both realtime and simulation modes.
