EXP: 3b3

# HUB AND SWITCH

## AIM:

TO Compare the packet forward behavior of a Hub and a Switch using Cisco Packet Tracer.

## STEPS:

Create one network using a hub and another using a switch, each connected to 4 PCs

Configure IP addresses for all PCs in both networks.

Send a simple PDU between two PCs in each networks.

Observe packet transmission in simulation mode.

Compare how the hub and switch forward packets

RESULT:-

The hub broadcast packet to all connected devices, whereas the switch forwards packets only to the intended destination. Therefore, the switch provides better performance, reduced network traffic, and improved efficiency compared to the hub
