HUB

AIM:

to study the behaviour of a hub by observing how it forwards data packet using Cisco Packet tracer.

STEPS:

Open Cisco Packet tracer

Drag and place 1 Hub and 4 generic PCs into the workspace.

Connecting all PCs to the Hub using Copper straight-through Cables.

Configure IP addresses for all PCs in the same network.

Select Add simple PDU from the common tools bar.

Send a packet from one PC(source) to another PC (destination).

Switch to simulation mode and Observe how the hub forwards the Packets.

RESULT:-

The hub broadcast the recieved packet to all connected device. Every Pc recives the packet, but only the destination Pc accepts, it while the other discard it.
